

TAIEX-RIPAP STUDY VISIT MONTENEGRIN TEAM TO SLOVENIA

Monique Voogt

13 November 2017

This Project is funded by the
European Union

A project implemented by
Human Dynamics Consortium

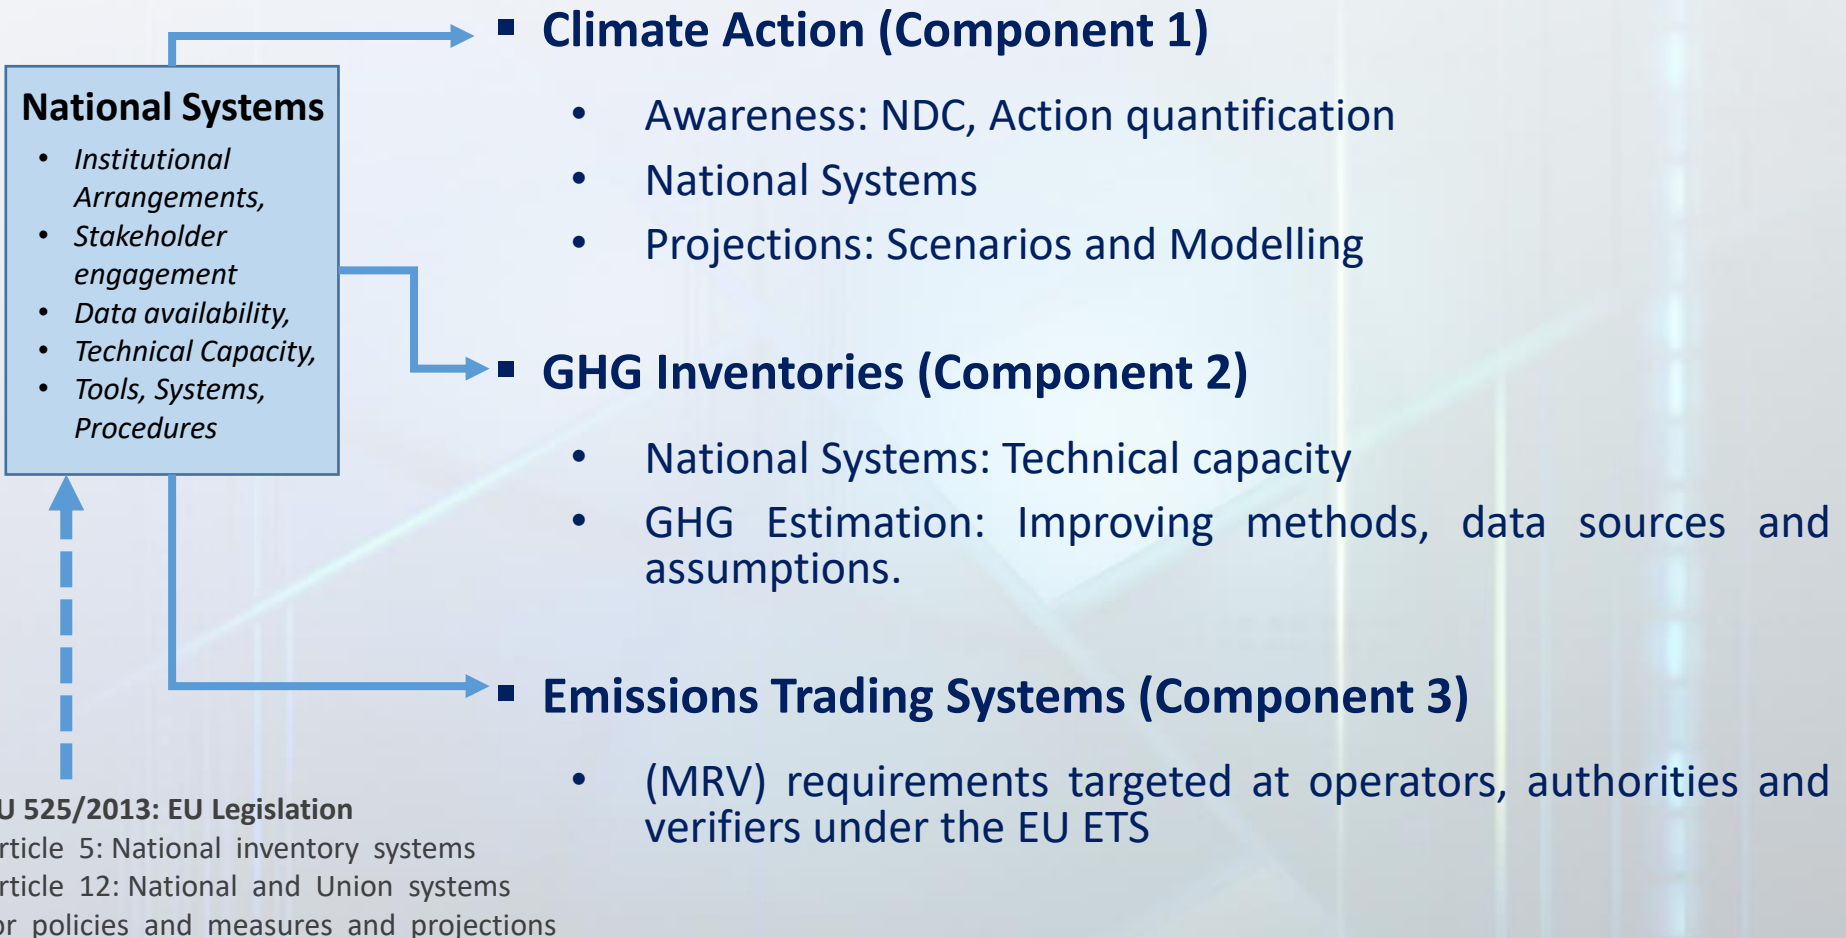

Regional Implementation of Paris Agreement Project - RIPAP

- RIPAP aims to support capacity building for:
 - Implementation of the 2015 Paris Agreement
 - Low emissions development strategies
- And to support regional cooperation through exchange of:
 - Information
 - Best practices
 - Experience
 - Awareness-raising low emissions development strategies
- RIPAP targets 6 countries in the Western Balkan and Turkey
- RIPAP runs from August 2017 – October 2018
- The project builds on earlier network cooperation conducted under the RENA (2010-2013) and ECRAN (2013-2016) projects

RIPAP: Scope (MRV/Transparency)

Long term Solutions for Beneficiary countries: “decision maker support tools”

RIPAP Events and indicative timeline

- **National Systems:** Awareness and building of National Systems.
 - Remote engagement & mentoring
 - National Systems workshop (**January 2018**)
- **GHG Estimation:** Improving methods, data sources and assumptions.
 - Remote engagement & mentoring.
 - Modelling systems and tools (**May 2018**)
 - GHG inventory improvement (**June 2018**)
 - Data availability for modelling (**Sept 2018**)
- **EUETS:**
 - Supporting implementation of climate change policy in Montenegro. Study tour or to Slovenia. (**Nov 2017**)
 - Extensive training on MRV for EU ETS in Serbia (**Mar 2018**)
 - Regional training event (**Apr 2018**)
 - ETS stakeholder information in The former Yugoslav Republic of Macedonia (**Jun 2018**)
 - EU ETS newsletters (4 editions; first one published October 2017)

Regional Implementation
of Paris Agreement Project

This training: study tour for Montenegrin experts to Slovenia

This Project is funded by the
European Union

A project implemented by
Human Dynamics Consortium

Overview of the study tour

- Aim of the visit: support Montenegro in (preparing for) implementation of EU emissions trading.
- The training will help to identify the steps required towards implementation, the capacity needs, and the required involvement of various stakeholders.
- Means: learning from peers in Slovenia; seeing specific examples and discussing practical needs and impacts
- Agenda includes:
 - Visit to aluminium plant and two power plants
 - Organisational set-up at Ministry and EA
 - Understanding permitting process and registry system
 - Data management systems
 - Learning about preparation of monitoring plans and emission reports
 - Understanding impact ETS on companies

Regional Implementation
of Paris Agreement Project

The RIPAP project is implemented by a consortium consisting of:
Human Dynamics (lead), the Regional Environment Center, Aether,
Klimapolitika and SQ Consult
